

Masterclass: Advanced SQL Server Performance Tuning SQL Server 2012 / 2014

*Authored training by Maciej Pilecki
(3 days)*

Overview

This class is designed for experienced DBAs and Database Application Developers who want to update and organize their skills in the designing, developing and maintaining high-performance applications utilizing Microsoft SQL Server. While this class will be presented using SQL Server 2012, most of the tools and techniques presented are not specific to particular version of SQL Server and can be applied on any version of the product.

Trainer:

Maciej Pilecki

SQL Server Most Valuable Professional (MVP)
Microsoft Certified Trainer (MCT)
Microsoft Certified Master (MCM): Microsoft SQL Server

Target audience

Experienced Database Administrator
Experienced Database Developer

Module 1. Introduction to SQL Server Performance Tuning
Module 2. Hardware and OS Tuning
Module 3. Instance-level Performance Tuning
Module 4. Understanding Waits and Queues

Module 5. Plan Compilation and Recompilation
Module 6. Query Tuning
Module 7. Index Tuning
Module 8. Parallelism and Performance

When, Where

Warsaw, 20-22.10.2014

Golden Floor, Millennium Plaza, Al. Jerozolimskie 123A

Price

Standard price: 5250 PLN net/person
